Without technology and innovation, there can be no sustainable development.

I'm Charles Lee, Founder and CEO of OneAsia.

Doing business requires an artisanal mindset. Be professional, innovative, maintain integrity and pass on the craft

My company is OneAsia. Data come with no boundaries. We have a goal. To make our mark in Hong Kong and branch out to Asia

Our businesses cover two fields, Electrical and mechanical services, like ventilation, fire safety, waterworks and electricity. And for IT, we have cloud computing and networking systems. We provide comprehensive services to our customers, running 24/7, without a break or interruption.

Imagine if the stock market's data centre crashed, and stock trading grinded to a halt, the resulting loss and impact could be enormous.

Talking about an experience regarding "To Infinity and Beyond", I remember
when the dot-com bubble burst, we had to build our first data centre. Many people said that was impossible. But I was certain that it's possible

Dream it possible!
When you want to fly high, you need to stoop a little before you can spread your wings and soar. Don't limit yourself, innovate with technology, keep providing what the market needs.

In these 10 years, Hang Seng has been helping our company grow, Hang Seng Bank is very forward-thinking. Data centre was a very novel field back in the days. We really felt that Hang Seng was willing to understand it to look into the company's potential and not see us as a property investment or a traditional industry, they truly support the development of Hong Kong businesses

I wish Hang Seng will continue to support the innotech industry,
talk to the bank soon, so you can accomplish your goals, don't stop at dreaming!
