When the Declared Rate of the year is declared as soon as practicable after 31 December each year, the value of each members' account will be adjusted in the form of additional units in order to ensure that the return of that member's investments in the Investment Portfolio for that year is in accordance to the Declared Rate. Conversely, the member would not be entitled to such additional units should the member's investment is redeemed from the fund in the middle of a financial year, and the return of the member would be calculated according to the year-to-date Declared Rate which could be lesser than the Declared Rate.
