Bonds are not deposits and should not be treated as substitute for conventional time deposits. Certificate of Deposit is not a protected deposit and is not protected by the Deposit Protection Scheme in Hong Kong. Investors who purchase bonds/CDs are exposed to the credit risk of the issuer and guarantor (if any) of the bonds/CDs. There is no assurance of protection against a default by the issuer/guarantor in respect of the repayment obligations. ## **29. FX and Precious Metal Margin Trading Services**

- 29.1 For FX and Precious Metal Margin Trading Services details, please refer to [hangseng.com/en-hk/investment/fx-and-precious-metal-trading-services/margin/](http://hangseng.com/en-hk/investment/fx-and-precious-metal-trading-services/margin/).
- 29.2 The risk of loss in leveraged foreign exchange and precious metal trading can be substantial. You may sustain losses in excess of your initial margin funds. Placing contingent orders, such as "stop-loss" or "stop-limit" orders, will not necessarily limit losses to the intended amounts. Market conditions may make it impossible to execute such orders. You may be called upon at short notice to deposit additional margin funds. If the required funds are not provided within the prescribed time, your position may be liquidated. You will remain liable for any resulting deficit in your Account. You should therefore carefully consider whether FX and precious metal margin trading is suitable for you in light of your own financial position and investment objectives. Renminbi (RMB) is subject to foreign exchange control by the PRC government. If your Margin Trading Contract involves Offshore Renminbi, you will be subject to foreign control and currency risk of RMB. Trading on an electronic trading system may differ from trading on other trading systems or platforms. You will be exposed to risks associated with the system including the failure of hardware and software, which could result in your order not being executed according to your instructions or at all. Investment involves risks. The above risk disclosure cannot disclose all the risks involved. You should read and understand all the relevant documents and risk disclosure (in particular, the Risk Disclosure Statement contained in the relevant application form) before

making any investment decision. Please read the Important Risk Warning  
[hangseng.com/cms/spd/chi/PDF/rmt\\_eng\\_rds.pdf](http://hangseng.com/cms/spd/chi/PDF/rmt_eng_rds.pdf).

### **30. FX2 – FX and Precious Metal Trading Services**

30.1 For FX2 - FX and Precious Metal Trading Services details, please refer to  
[hangseng.com/en-hk/investment/fx-and-precious-metal-trading-services/fx2/overview/](http://hangseng.com/en-hk/investment/fx-and-precious-metal-trading-services/fx2/overview/).

30.2 Foreign exchange and precious metal trading involves a high degree of risk. You may sustain a substantial or even total loss of your initial collateral. Under certain market conditions, you may find it difficult or impossible to liquidate a position of outstanding FX2 Trading Contracts. Placing contingent orders, such as "stop-loss" or "stop-limit" orders, will not necessarily limit your loss at the designated price. In extreme circumstances whereby the market moves significantly against your positions, you may be required to make additional deposits or interest payments within a short period of time to maintain your positions. If you fail to provide the required deposits or interest payments immediately, your positions under all outstanding FX2 Trading Contracts may be closed out without prior notice. You should therefore carefully consider if foreign exchange and precious metal trading is suitable for you in light of your own financial position and investment objectives. Renminbi ("RMB") is subject to foreign exchange control by the PRC government. If your FX2 Trading Contract involves offshore RMB, you will be subject to foreign control and currency risks of RMB.
