

Addressing Climate Change

Hang Seng – CA Eco-Rangers

Programme Period: 2015 to present

Objective: To raise public awareness of environmental protection and sustainable development issues in Hong Kong

Partner: The Conservancy Association

Target Audience: General public

Details: Eco-Rangers is an annual orienteering competition for the public to gain environmental protection and ecological knowledge through interesting environmental education games. In 2021, owing to COVID-19 and social distancing measures, the Programme introduced the theme of “Healing Hills” and organized hill cleanup activities from Sep to Dec along several local hiking trails. Apart from that, various interactive environmental workshops and social media engagement activities were held to raise public awareness of environmental protection.

Impact: The orienteering competition was attended by about 400 people every year. In 2021, over 400 people took part in small group hill cleaning activities and collected around 60kg of wastes and over 220kg of recyclable wastes.
