Risk Disclosure Statement of Investment Financing Service

PLEASE READ THIS RISK DISCLOSURE STATEMENT CAREFULLY AND CONSULT YOUR OWN LEGAL ADVISER AND/OR OTHER PROFESSIONAL CONSULTANTS AS YOU CONSIDER APPROPRIATE BEFORE YOU DECIDE TO APPLY FOR INVESTMENT FINANCING SERVICE.

Below are the key risks associated with Investment Financing Service (the “Facility”) which are not exhaustive. The Facility is provided by Hang Seng Bank Limited (the “Bank”).

1. Risk of Trading in Investment Funds and other Investment Products

You should note that all investments involve risks (including the possibility of loss of the capital invested). Prices of units of investment funds or other investment products may go up as well as down and information on past performance is not indicative of future performance. It is as likely that losses will be incurred rather than profit made as a result of buying and selling investment products. You should read and understand the relevant product's offering documents (including the full text of the risk factors stated therein) in detail before making any investment decision.

2. Risk of Using Leverage

The prices of investment funds and other investment products fluctuate, sometimes dramatically. Financing transactions in investment products by collateral using leverage involves significant risk, and losses may exceed the value of your collateral and may affect your ability to repay the Facility. The higher your leverage is, the bigger your losses can be in adverse market conditions. Contingent orders such as “stop-loss” or “stop-limit” orders may not necessarily limit losses as market conditions may make it impossible to execute contingent orders. You may be required at short notice to make additional margin deposits or interest payments. If the required margin deposits or interest payments are not made within the prescribed time, your collateral may be liquidated without your consent. Force Liquidation may result in losses and you will remain liable for any resulting deficit in your account and interest charged on your account. You should therefore carefully consider whether such a financing arrangement is suitable for you in light of your own financial position and investment objectives.

3. Risk associated with Margin Requirements

The Facility is a financing arrangement with margin requirements. The Available Limit of the Facility is determined by the aggregate of the market value of the investment products charged by you in favour of the Bank as collateral from time to time (“Charged Securities”) multiplied by the applicable Loan Ratio and capped at the Ceiling Limit. The Loan Ratio and the Ceiling Limit are set and may be varied by the Bank from time to time. If unauthorised overdraft occurs (i.e. when the loan amount exceeds the Available Limit) for any reasons, including but not limited to decrease in value of the Charged Securities, change of the Loan Ratio or termination of the Facility, interest on the unauthorised overdraft amount will be charged at the unauthorised overdraft interest rate(s) and you undertake to forthwith repay the unauthorised overdraft amount in cash or dispose of your investments and apply the proceeds towards repayment of the unauthorised overdraft amount.

If you do not act promptly upon receiving a Margin Call notice and do not take the required actions within a prescribed period, the Bank may exercise various rights, including the right to liquidate part or all of the Charged Securities, and the right to set-off any cash held in your account at the Bank towards any amount owing by you to the Bank under the Facility, in each case at any time and in any way the Bank considers appropriate without demand or notice to you (even if the market value of the Charged Securities drops drastically due to adverse market conditions). You will bear all losses and remain liable for any resulting deficit in your account and interest charged on your account. Commissions, fees and other charges applicable to the Facility may also increase your loss. You should therefore carefully consider whether such a financing arrangement is suitable in light of your own financial position and investment objectives.

4. Interest Rate risk

The interest rate applicable to the Facility is based on Hong Kong Dollar Prime Lending Rate as quoted by the Bank from time to time (“HKD Prime”) plus or minus a pre-determined rate set by the Bank. The interest rate may be subject to change over time. When HKD Prime rate increases, the interest payment under the Facility will increase.

5. Currency Risk

If any of the Charged Securities is denominated in a currency different from the Facility (which is denominated in Hong Kong dollar), a conversion of one currency into another currency is required and such conversion shall be calculated at the rate determined by the Bank to be prevailing in the relevant foreign exchange market at the relevant time. The value of the Charged Securities and the Available Limit of the Facility may change due to fluctuations in foreign exchange rate.

6. Liquidity Risk

If the Bank exercises its right to liquidate the Charged Securities under adverse market conditions, it may be difficult to sell the Charged Securities and the selling price may also be affected when there is no or little liquidity for the Charged Securities in the market. You will be liable for the shortfall if the amount of sales proceeds of the Charged Securities is not sufficient to pay off the amount owing by you to the Bank under the Facility.

7. Risk of Providing an Authority to Hold Mail or to Direct Mail to Third Parties

If you provide the Bank with an authority to hold mail or to direct mail to third parties, it is important for you to promptly collect in person all contract notes and statements of your accounts and review them in detail to ensure that any anomalies or mistakes can be detected in a timely fashion.

8. Risk of Client Assets Received or Held Outside Hong Kong Special Administrative Region

Client assets received or held by the Bank outside the Hong Kong Special Administrative Region are subject to the applicable laws and regulations of the relevant overseas jurisdiction which may be different from the Securities and Futures Ordinance (Cap.571, Laws of Hong Kong) and the rules made under it. Consequently, such client assets may not enjoy the same protection as that conferred on client assets received or held in the Hong Kong Special Administrative Region.

Risk Disclosure of Securities Investment:

Investors should note that investment involves risks. The prices of securities fluctuate, sometimes dramatically. The price of a security may move up or down, and may become valueless. It is as likely that losses will be incurred rather than profit made as a result of buying and selling securities.

Investors should note that investing in different Renminbi-denominated securities and products involves different risks (including but are not limited to currency risk, exchange rate risk, credit risk of issuer / counterparty, interest rate risk, liquidity risk (where appropriate)). The key risks of investing in securities via the Stock Connect Northbound Trading include:

- Once the respective quota is used up, trading will be affected or will be suspended.

- Stock Connect Northbound Trading will only operate on days when both markets are open for trading. Investors should take note of the days the Stock Connect Northbound Trading is open for business and decide according to their own risk tolerance whether or not to take on the risk of price fluctuations in securities during the time when Stock Connect Northbound Trading is not trading.
- When a security is recalled from the scope of eligible securities for trading via Stock Connect Northbound Trading, that security can only be sold but NOT bought.
- Investors will be exposed to currency risk if conversion of the local currency into RMB is required.

Foreign securities carry additional risks not generally associated with securities in the domestic market. The value or income (if any) of foreign securities may be more volatile and could be adversely affected by changes in many factors. Client assets received or held by the licensed or registered person outside Hong Kong are subject to the applicable laws and regulations of the relevant overseas jurisdiction which may be different from the Securities and Futures Ordinance (Cap.571) and the rules made thereunder. Consequently, such client assets may not enjoy the same protection as that conferred on client assets received or held in Hong Kong.

Investors should note that ETF is different from a typical unit trust and many factors will affect its performance. In general, the market price per ETF unit may be significantly higher or lower than its net asset value per unit due to market demand and supply, liquidity, and scale of trading spread in the secondary market and will fluctuate during the trading day. ETF is different from stocks, investors should read the offering documents of the relevant ETF and understand the features and risks of ETF etc.

RMB Currency Risk

Renminbi ("RMB") is subject to exchange rate risk. Fluctuation in the exchange rate of RMB may result in losses in the event that the customer subsequently converts RMB into another currency (including Hong Kong Dollars). Exchange controls imposed by the relevant authorities may also adversely affect the applicable exchange rate. RMB is currently not freely convertible and conversion of RMB may be subject to certain policy, regulatory requirements and / or restrictions (which are subject to changes from time to time without notice). The actual conversion arrangement will depend on the policy, regulatory requirements and / or restrictions prevailing at the relevant time.

Foreign Currency Risk

Foreign Exchange involves Exchange Rate Risk. Fluctuations in the exchange rate of a foreign currency may result in gains or loss of principal in the event that the customer converts the deposits from Hong Kong Dollar or foreign currency to another currency, and/or in the event that the customer converts a foreign currency time deposit to another currency (including Hong Kong Dollar) upon maturity.

Risk disclosure

Foreign currency transactions involve fluctuations in exchange rates. When the transaction amount is debited from your foreign currency account, the account balance is subject to exchange rate risk, which may result in gains or losses. Please ensure there is a sufficient balance of foreign currency in your account; otherwise, we'll convert HKD into the relevant currency to complete the transaction, which may result in a loss for your account.
